PROFESSIONAL SUMMARY

iOS Engineer with **8+ years** taking ownership of native iOS applications in **Swift, UIKit, and SwiftUI** — implementing new features, building new UI pages, testing, and shipping releases. Strong with **REST API integration, push notifications, multithreading, caching, and memory management**, plus **localisation and multi-region releases** that take apps into new markets. Comfortable with **MVC and MVVM**, real-time data UIs, and **performance optimisation** with Instruments. Built and run **CI/CD with Fastlane** for fast, reliable App Store delivery. Proven track record working **independently in fully remote, globally distributed teams**. Fluent English.

TECHNICAL SKILLS

iOS Core	Swift · UIKit · SwiftUI · Combine · Swift Concurrency (async/await, GCD) · Xcode · Instruments
Architecture	MVC · MVVM · Clean Architecture · SOLID · Modular Design
API & Networking	REST · JSON / XML · URLSession · Alamofire · WebSockets · Real-Time Data · Caching
Multithreading	GCD · Operation Queues · async/await · Background Processing · Thread-Safe Design
Push & Releases	APNs Push Notifications · Multi-Region Rollouts · Localisation · App Store / TestFlight
Performance	Instruments Profiling · Memory Management · Smooth Responsive UI · Efficient Data Structures
Security	Secure Coding · Keychain · Data Protection · Token / Session Mgmt · Biometric Auth
Quality & CI/CD	XCTest · UI Testing · Jenkins · Fastlane · GitHub Actions · Bitrise · Slack Release Automation · Agile / Scrum

PROFESSIONAL EXPERIENCE

Senior iOS / Mobile Engineer · **Kaso (YC W22)**

Sep 2022 – Present · Dubai, UAE

Own and ship native iOS features end-to-end on a fast-scaling, multi-region platform.

- Take ownership of the native iOS app in **Swift / SwiftUI / UIKit**, building new end-to-end features and UI pages from design to release.
- Integrate **REST APIs** (JSON, token auth) and **APNs push notifications**; deliver **real-time data UIs** with reliable caching and offline support.
- Apply **multithreading** (GCD, async/await) and careful **memory management**; profile with **Instruments** to sustain **99.5% crash-free** sessions.
- Support **localisation and multi-region rollouts**, releasing app versions across new markets.
- Built and own full **CI/CD pipelines with Jenkins + Fastlane** — automated builds, releases, and Slack notifications on every deploy.
- Collaborate with designers, PMs, and backend engineers across time zones and drive code reviews.

Stack: Swift · SwiftUI · UIKit · REST · APNs · MVC / MVVM · Instruments · Jenkins · Fastlane

iOS Team Lead / Senior iOS Engineer · **KAIZEN Asset Management Services**

Jul 2020 – Aug 2022

Led iOS development for fintech & e-commerce apps serving 50,000+ users.

- Architected native **iOS apps (Swift, UIKit)** with **MVC / MVVM**; led a 5+ engineer team and code reviews.
- Built features with **push notifications, secure coding** (Keychain, biometric auth, token/session mgmt), and REST API integration.
- Established **CI/CD** (Fastlane, Azure DevOps) for ~40% faster deploys; automated testing cut production bugs ~70%.

Stack: iOS · Swift · UIKit · MVC / MVVM · Keychain · Fastlane

Senior iOS Engineer (Contract, Remote) · **IXCoders**

Jan 2021 – Jun 2022 · Remote

- Worked **fully remote** building **iOS (Swift)** apps for e-commerce and delivery (100,000+ downloads); REST integration, caching, offline support.
- Maintained **CI/CD (Fastlane)** for automated daily App Store / TestFlight releases with comprehensive testing.

Stack: iOS (Swift) · REST · Caching · Fastlane

iOS Developer (Freelance, Remote) · **Magma**

Oct 2020 – Sep 2021 · Remote (Lebanon)

- Built a **multi-language iOS app** in Swift with light/dark theming, responsive accessible UI, and an admin control panel; unit/UI testing and automated deployment.

Stack: iOS · Swift · Responsive UI · Localisation · Fastlane

iOS Developer (Freelance, Remote) · **Nayotec Technologies**

Sep 2019 – Apr 2020 · Remote

- Developed a native **iOS (Swift)** B2C e-commerce marketplace app focused on UX, reliability, and performance; UI and unit testing with automated deployment.

Stack: iOS · Swift · Xcode · Bitrise

iOS Developer · **AutoTech Co**

Feb 2018 – Jun 2020 · Syria

- Built native **iOS apps (Swift, UIKit)** for automotive & logistics serving 20,000+ users; delivered 4 apps with **4.5★+ ratings** through strong UI/UX and performance focus.

Stack: iOS (Swift) · UIKit · MVC · Cross-Platform

COMPETITIVE PROGRAMMING

ICPC / ACPC Finalist — 4000+ problems solved across Codeforces, HackerRank, AtCoder, LeetCode. 2nd Place ICPC Syrian Championship (2024) · 5th Place ICPC Damascus (2023). Strong algorithms, data structures, and optimisation — directly useful for elegant, performant iOS code and efficient real-time data handling.

EDUCATION

Bachelor's Degree, Software Engineering & Information Systems
Damascus University — Faculty of Information Technology Engineering · 2015 – 2021

LANGUAGES

Arabic — Native · **English** — Professional

CERTIFICATIONS

SQL (Advanced) — HackerRank · Problem Solving — HackerRank · Full Stack Developer — Imagine Foundation e.V. · CSDA — AutoTech Co
